Use a QR reader (such as Zapper) on a (fully charged) smartphone or other device played through in- or on-ear headphones (not over-ear, as it is imperative that you are able to hear the sounds around you) Exercise particular care when walking on roads as wearing headphones and listening to the soundtrack can be highly disorienting. Participants undertake the walk on the understanding that the artists are not held liable for any injury or damage howsoever caused and that participants in the soundwalks do so entirely at their own risk.
